

## NOTICE TO AUTHORS

---

1. In view of the difficulties experienced in connection with the preparation and printing of papers for the Congress the following resolution was passed by the General Committee:—

“In future no papers whatsoever shall be read at the Annual Congress of the South African Sugar Technologists' Association which have not been sanctioned by the Publications' Committee, and further, that all papers intended for the Congress must be received by the Technical Secretary not later than February 28th in each year.”

2. Every author is requested to submit typescript in double-line spacing; if this is not possible the manuscript must be submitted in a form easily legible. Only one side of the sheet must be written on. This is very important.
3. Illustrations and diagrams accompanying the papers must be carefully drawn so as to be suitable for reproduction on **smooth, white drawing paper in Indian Ink**. Any lettering on margins should be in pencil so as to allow of easy replacement by printers type. The size of the largest diagram, curve, etc., should not be greater than 10 by 15 inches.
4. Curves should be drawn on black graph paper which can be obtained from the Technical Secretary.
5. Authors may have ten copies of their papers on application to the Technical Secretary.
